Academic Assessment in the Digital Era: Moodle Tools and AI Challenges

WORKSHOP

NUMBER OF PARTICIPANTS

- maximum 30 participants

DURATION

- 3 hours

OBJECTIVE:

Upon completion of this course, participants will be able to

- Design and implement assessment strategies using Moodle's Evaluation Book and related tools.
- Analyse and interpret learning data and reports to support academic decision-making and student success.
- Utilise Moodle's analytics features to enhance feedback, transparency, and pedagogical alignment.
- Critically reflect on the role of artificial intelligence in educational assessment, considering its ethical implications and pedagogical impact.

SUMMARY:

- This workshop provides university teachers with a deeper understanding of Moodle's assessment and reporting functionalities, supporting evidence-based teaching and learning. Participants will explore the Evaluation Book, reporting dashboards, and learning analytics to inform instructional design and learner support.
